LIGHTING LAYOUT RECOMMENDATIONS:

Refer to the product data sheet available at www.landscapeforms.com for recommendations for light pole spacing.

Landscape Forms is not responsible for site preparation and footings.

CAUTION! This unit is heavy. To avoid injury or damage to the finish, we recommend using a crane or lift for hoisting the unit onto the anchors.

WARNING! Pole mounted luminaires must be attached either before or *immediately* after pole installation. Failure to do so may cause vibration damage to the pole and will void the pole warranty.

INSTALLATION PROCEDURE FOR ANCHOR BOLTS:

1. Prepare footing as required by local codes.
2. Install anchor hooks, hex nuts, washers and wooden template as shown in Fig 3. Level template in all directions. **Note:** template thickness is less than base plate thickness. Dimensions given account for the difference.
3. After footing has properly cured, remove wooden template. Do not remove lower hex nuts or washers.

INSTALLATION PROCEDURE FOR LIGHT POLE:

1. Lift the light pole into position over the installed anchors. Ensure that the base plate is resting on all four washers.
2. Install washer and hex nut as shown in Fig. 4.
3. Plumb and level the pole and tighten all anchors.
4. Install luminaire. Refer to luminaire installation guide for mounting luminaire to pole.
5. Make electrical connections. Refer to wiring diagram.
6. Install the top cap on the pole (shipped with the pole). If the unit has a twist lock receptacle, assemble the receptacle and the top cap as shown in Fig. 5 and connect wiring before installing the top cap.
7. Install the nut covers as shown in Fig. 6.

WARNING! Pole mounted luminaires must be attached either before or *immediately* after pole installation. Failure to do so may cause vibration damage to the pole and will void the pole warranty.

Calculations per AASHTO 1994, assuming base of the pole is at grade level.

Center of pressure for total fixture EPA is placed at the pole top. Center of gravity for total fixture weight is placed one foot horizontally out from pole to calculate base overturning moment and base shear.
