

Disc

landscapeforms®

Product Data Sheet

The elegant, minimalist form of Disc reimagines the sun shade to offer landscape architects new opportunities to define space and provide shelter in an artful, modern way. Designed by Scott Klinker and inspired by the graceful yet robust nature of post and beam construction, Disc features a strong, confidence-inspiring form complemented by a clean, open interior unobstructed by any visible hardware. The canted circular shade both facilitates runoff and lends Disc a directional quality, offering increased visual intrigue both when standing alone or working in conjunction with other shades.

General Description

- Disc is constructed from cast and extruded aluminum
- Available with solid or perforated panels
- Disc is rotationally adjustable
- Base or surface-mount table required

Mounting Options

- When used with a Landscape Forms table, Disc must be mounted to the table, which in turn must be mounted to, or embedded in, a hard surface.
- If used with a table other than those offered by Landscape Forms, Disc must be anchored to our surface-mounted stand.
- Disc may also be used without a table, but must be secured in our surface-mounted stand.

Finishes

- All metal parts are finished with Landscape Forms' exclusive Pangard II® polyester powdercoat – a hard, yet flexible, finishing process that resists rusting, chipping, peeling and fading.

To Specify

- Select perforated or solid panels, and powdercoat color(s).
- Specify to mount in Landscape Forms surface mount or embedded table.
- Specify surface mount stand if using with table other than those supplied by Landscape Forms, or if used without a table.
- Specify color for stand.

| Disc | Diameter | Height | Weight |
|---|----------|--------|---------|
|  | 89.25 in | 91 in | 118 lbs |
