## Product Data Sheet

The Mirador planter's oval-shaped design is formed by four molded concrete pieces. It has a built-in bench around the perimeter. Each planter-bench can seat up to 12 people. The planter-benches rest on paving with no need for anchors.

### Bench

- Mirador is an oval-shaped planter that is formed by four adjacent concrete parts.
- Each single concrete part has a built-in bench around the perimeter.
- The Mirador is installed in four individual pieces to ease shipping and handling.
- Units are freestanding.

### Material

- Cast stone is poured and cast over a stainless steel bar cage built to fit within the walls of the mold.
- Cast Stone makes it possible to cast thinner, irregularly shaped forms while retaining appropriate strength.
- The colors of Escofet cast stone products are neutral, muted and earth-toned and are derived from the aggregates used in casting.
- No color is added in manufacture and no color is applied to finished products.
- The color range of every Escofet cast stone product is predetermined by the formulation used in its manufacture.
- Cast stone products do not require any specific maintenance during their estimated lifespan of more than 30 years. Water absorption and freeze-thaw cycles can cause weathering, a reproduction of the process that takes place in natural rock.
- Escofet applies a waterproof finish to its products to protect against this process.
- Escofet cast stone products are large and heavy.
- Shipping, receiving, staging and installing these pieces is more akin to handling large statuary or pre-fabricated architectural elements.
- See installation guide for important information.
