

Stretch

landscapeforms®

Product Data Sheet

A material translation of a traditional umbrella, Stretch evokes the appearance of taut fabric stretched over fanned ribs. In contrast to its formal inspiration, Stretch's cast aluminum shade and minimalist construction offer a more durable, confidence-inspiring silhouette while allowing the interior to be unobstructed by visible hardware. Designed by Scott Klinker through a distinctly architectural lens, Stretch is both a site furnishing and an iconic piece of architecture, allowing landscape architects to accentuate their unique design language with a more artful expression of the sun shade.

General Description

- Stretch is constructed from cast and extruded aluminum
- Available with solid or perforated panels
- Stretch is rotationally adjustable
- Surface mount stand or embedded mount required

Mounting Options

- When used with a Landscape Forms table, Stretch must be mounted to the table, which in turn must be mounted to, or embedded in, a hard surface.
- If used with a table other than those offered by Landscape Forms, Stretch must be anchored to our surface-mounted stand.
- Stretch may also be used without a table, but must be secured in our surface-mounted stand.

Finishes

- All metal parts are finished with Landscape Forms' exclusive Pangard II® polyester powdercoat – a hard, yet flexible, finishing process that resists rusting, chipping, peeling and fading.

To Specify

- Select perforated or solid panels, and powdercoat color(s).
- Specify to mount in Landscape Forms surface mount or embedded table.
- Specify surface mount stand if using with table other than those supplied by Landscape Forms, or if used without a table.
- Specify color for stand.

Stretch	Width	Depth	Height	Weight
	78"	78"	92.25"	120 lbs
